ORAN 3	ORAN 3	Schengen visa after Jan 1, 2020, valid $>$ 6 months, $<$ 2 years	Individual / Family	Select visa type and sub-type (not specified).
ORAN 4	ORAN 4	Schengen visa after Jan 1, 2020, valid \geq 2 years	Individual / Family	Select visa type and sub-type (not specified).
ALG 1	ALG 1	Never obtained a Schengen visa or issued before 2020	Individual / Family	Select visa type and sub-type (not specified).
ALG 2	ALG 2	Schengen visa after Jan 1, 2020, valid \leq 6 months	Individual / Family	Select visa type and sub-type (not specified).
ALG 3	ALG 3	Schengen visa after Jan 1, 2020, valid $>$ 6 months, $<$ 2 years	Individual / Family	Select visa type and sub-type (not specified).
ALG 4	ALG 4	Schengen visa after Jan 1, 2020, valid \geq 2 years	Individual / Family	Select visa type and sub-type (not specified).
Not Specified	FAMILY GROUP	Children $<$ 12, parents with visa valid $>$ 180 days	Family	For children $<$ 12; requires proof of parental visa.
N/A	Application Process	N/A	Individual / Family	Book, manage, cancel, or reprint via BLS platform.
N/A	Premium Lounge	N/A	Individual / Family	Optional; does not guarantee earlier appointments.
N/A	Travel Insurance	N/A	Individual / Family	Available during application process.
N/A	Submission	N/A	Individual / Family	Select location, visa type, sub-type, category, appointment type.

Table 1: Comprehensive Visa Application Details

2 Important Notes

- **Category Accuracy:** Applicants must select a category matching their Schengen visa history. Incorrect selection leads to rejection at the visa center, with no refund of service fees.
- **Family Appointments:** Members must be immediate family with the same surname (except spouses). Proof of relationship is required if surnames differ. The Visa Application Center manager may refuse applications without valid proof.
- **Family Group Category:** Exclusively for children under 12 whose parents hold a visa valid for more than 180 days.
- **Registered User:** The main applicant must complete the appointment process for family applications.

3 Notes for AI Application Development

- **Data Structure:** Create a database schema for locations, categories, visa history requirements, appointment types, and additional details. Use relational keys to link categories with locations and appointment types.
- **User Interface:** Implement dropdowns for Location (ORAN 1-4, ALG 1-4), Category (ORAN 1-4, ALG 1-4, FAMILY GROUP), and Appointment Type (Individual, Family). Show Number of Members field only for Family appointments.
- **Validation Logic:** Validate category selection against visa history (e.g., ORAN 1/ALG 1 for no visa or pre-2020). Use client- and server-side checks with error messages for mismatches.
- **Family Appointment Handling:** Require fields for each family members details and file upload for relationship proof if surnames differ. For FAMILY GROUP, verify parent visa (> 180 days) and child age (< 12).
- **Premium Lounge Option:** Add a checkbox for Premium Lounge with a tooltip stating it does not prioritize appointments.
- **Appointment Management:** Support booking, managing, canceling, and reprinting appointment letters. Track the main applicants session for family applications.
- **Error Handling:** Show warnings about non-refunded fees for incorrect category selection. Prompt visa history confirmation before submission.
- **Localization:** Support English, Spanish, French, and Arabic with a language selector.
- **Security:** Use secure authentication and encrypt sensitive data like relationship proofs.
- **API Integration:** Ensure API calls support BLS platform functions for booking, cancellation, and letter reprinting.
